OUR JOB'S DONE...

EXTEC

LEADERS IN EXTRUSION DIE TECHNOLOGY

...WHEN YOUR CLIENT'S HAPPY!

**Making dies that meets our
exacting standards is only part of it!**

It goes without saying that we have our own demanding quality control - in place to ensure that every die leaves here in perfect order. But it's quite normal to have to make minor adjustments to get a die working in situation. As such, the job's not done till you have a fully functioning die. That's when we say...***job done!***

“

We use Extec, because we demand more!
A die can leave the factory floor working perfectly,
but still need minor adjustments when we set it up here.
That's just the nature of this business. Extec don't consider
the job to be *done*, till the die is running perfectly, on site.

Brian Tindale *INEX*

A rigorous 15 point Quality Control check at each of our workstations, ensures that all dies leave here working perfectly. It's an uncompromising commitment to quality that wins us business time and again. It's also a measure of our passion for the industry. Our team delight in making the finest quality dies, on time, every time.

OUR DIES WORK

Clear communication and a website designed to function as a sophisticated (and confidential) business tool make the process seamless, painless and completely transparent.

You'll be able to monitor the progress on your job right through the design and production of your die.

Your job is treated in strict confidence, with access to your files restricted to authorised personnel. All files are protected by a security system that prevents unsanctioned access.

We commit to delivering your job on time! We're fully aware that you too have a production schedule - almost certainly dependant on us delivering a working die, by a set date. Our systems are in place to help ensure we do just that.

OUR SYSTEMS MAKE IT EASY!

**This industry has been good to us!
Time and again, we've secured
quality orders on the strength of
good work done for others.**

That's a very satisfying track
record and one we're pretty proud of.
we don't take it for granted. It's true
to say that you're only as good as
your last job.

OUR WORK SPEAKS FOR ITSELF

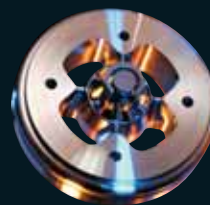

OUR RECORD'S IMPRESSIVE

The idea behind Extec was born on a fishing trip back in 1992. Founding directors, Morgan Hooper and Gil Harte, started the business with over 30 years combined experience, both as operators and as clients. Equipped with no small amount of enthusiasm, a healthy dollop of naivety (*they had no clients at the time*), a clear understanding of all facets of the business and enough self-belief to make it work, they did just that!

Over 15 years later, Extec has grown into one of New Zealand's leading aluminium extrusion die companies, supplying quality dies to clients worldwide.
